

October 13, 2020

Dear MW Legacy Parents;

We have been notified that persons in our building have recently been exposed to COVID-19. We are sending those people home for a 14-day quarantine.

I want to assure you that this notice is a precautionary measure. If your child had been in close contact with the individual who is experiencing symptoms or who is lab-confirmed positive for COVID-19, Health Services would have notified you to begin a 14 day quarantine period.

I want to remind you, as always, to follow all social distancing and mask protocols that the District has implemented.

Although the risk of exposure is very small, it is important to be alert and to monitor your child (ren) your family members, and those with whom your children have been in contact with for symptoms. This is a good practice at all times.

Those who experience symptoms are advised to seek medical attention and inform medical personnel of their exposure to COVID-19.

HIPAA laws prevent sharing identifying information of individuals and health status. Please do not speculate or confirm the identity of any person concerning specific details about personal illness. Please contact your school nurse or medic at 469-249-1099 with health related question you may have about your own child.

Sincerely,

Staci Weaver
Sr. Director School Operations
Legacy Preparatory Charter Academy
